

What ever happened to the theory of supply and demand. If the members of NAB was giving the people the programming that we wanted to listen to we would not be paying to listen to xm radio. I get a much larger variety of music and programming on xm than I have locally. My husband is a truck driver and he uses the traffic and weather channels a lot. It is not easy to find these channels locallyespecially on a full time basis. Please do not rule against the public by giving into the NAB Members. Please reject the NAB's petition 04-106.
